Kinco low voltage servo system

Shanghai Kinco Automation Co., Ltd. focuses on R&D, production, sales and technical services of automation standard products and intelligent hardware products, which is a leading supplier of machine automation and intelligent solutions for factories in China.

In 1996, Kinco has been providing total automation solutions for global industrial automation equipment manufacturers by relying on standard automation products such as HMI, servo system, stepping system, PLC, low-voltage inverter, etc. to penetrate into the industry, making China's automation solutions prevail all over the world. The company's HMI products have led the wave of HMI popularization in China, and its market share has maintained a leading position among local brand manufacturers for many years.

With the mission of "Making China's manufacturing become the top manufacturing in the world", Kinco company insists on investing a large amount of resources in the research and development of automated technology platforms, and sets up R&D facilities in Shanghai, Shenzhen and Changzhou. Kinco company has an automated technology platform that covers all aspects of control, drive, human-machine interaction, communication and electromechanical integration design. In the field of machine automation, Kinco focuses on the industry and has developed special solutions for logistics automation, service robots, medical instruments, professional drones, 3C machine tools, ozone and other industries.

In the field of smart factory, Kinco provides customers with the most easy-to-implement smart factory solutions for manufacturing companies at the field implementation level, PLC control and communication level, Scada and system integration level, and MES management level through its comprehensive automation technology platform and software system developed for smart factory.

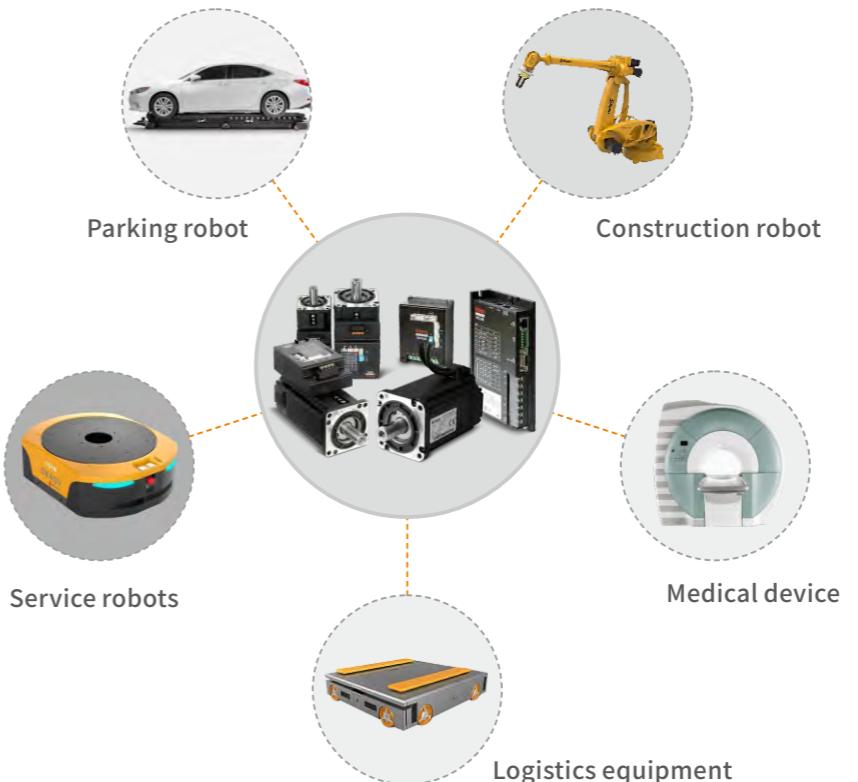

With the vision of "creating a better life intelligently" and adhering to the values of "maintain conscience in growth and hold ingenuity in innovation", Kinco is a platform to help employees maximize their creative potential and a partner to help customers succeed in innovative management. We develop products and operate businesses with innovative thinking and practical spirit, adhere to ideals, and expect human creativity to make the world more wonderful.

FD, OD, MD series low-voltage servo drives are a new generation of products with small size, good performance and high stability developed by Kinco Electric after years of market research and according to the characteristics of the logistics automation industry.

The working voltage of Kinco low voltage servo system is DC24~60V. Support CAN, Modbus, Ethercat, Profinet bus and pulse and other control methods. It can be matched with encoder motors such as photoelectric, magnetolectric, multi-turn absolute value, etc., and the product configuration is more flexible. Widely used in logistics storage equipment, mobile handling equipment, sorting trolleys, mobile service robots and other fields that have high requirements on voltage and volume.

For industrial customers who have special requirements in communication mode, installation mode, protection level, etc., our company also provides customized low-voltage servo drives and motors for customer application.

Note:1. "LL" in the power line/brake line/encoder line list indicates the cable length, please refer to the model description.

2. ★ENCHG-(4)-GU-DC is a necessary battery-powered cable for multi-turn absolute value encoder motors with 40CM cable length (ENCDG-LL-GU is an optional extension cable if the battery cable length cannot meet the field application).

Note:1. "LL" in the powerline/brake line/encoderlinelist indicates the cable length,please refer to the model description.

2. FD124S-AB-020-D2 doesn't support pulse

Introduction of low voltage servo drive

Features:

Control mode: support position, speed, torque control mode

Communication protocol: support CANopen, EtherCAT, RS485 and other communication protocols

Encoder: support photoelectric, magnetic encoder, absolute value and other encoder type motors
Can drive 50W~3Kw low voltage servo motor

Industry-specific: Provide a variety of special functions according to the needs of the AGV industry:
two-in-one drive, alarm braking, enhanced battery life

For customers who are more sensitive to space, we have launched a palm-sized OD series drive,
which can be customized and developed according to different working conditions of users

FD1X4S

OD1X4S

FD134S-CB-020-D2

Drive naming rule

Model: **FD124S-CB-000-D2**
① ②③ ④ ⑤ ⑥ ⑦

①-Serial number FD : FD series OD : OD series

②-Voltage input specifications 1:Input voltage DC24~60V

③-Rated output current
1:5Arms
2:15Arms
3:25Arms
4:40Arms
6:80Arms

④-Drive version 4S:4S version low voltage drive

⑤-Control method
AB:RS232、RS485、CANopen
LB:RS232、RS485、pulse
CB:RS232、CANopen
EB:RS232、EtherCAT

⑥-Software version number
000:Incremental encoder (communication, photoelectric encoder)
005:Absolute value encoder
020:mobile specific

⑦-Drive mode
D2:Two-in-one drive
Note: Applicable to FD134S series

Note 1. The output currents of FD124S, FD134S, and FD144S are 15Arms, 25Arms, and 40Arms, respectively, which is the value measured by installing the drive on an oxide black 6063 aluminum plate with a length*width*height of 300mm*300mm*10mm of the auxiliary heat sink.

2. The output current of the FD164S is 80Arms, and the drive needs to be installed on the auxiliary radiator with a length*width*height of 400mm*400mm*10mm and the measured value of the black oxide 6063 aluminum plate.

FD1X4S technical specifications table

FD1X4S servo drive technical parameter table						
Model parameters	FD114S-□B-00■	FD124S-□B-00■	FD134S-□B-00■	FD144S-□B-00■	FD164S-□B-000	
Rated input voltage	24VDC~60VDC					
Rated output current	Maximum continuous output current (rms)	5Arms (Up to 12Arms without auxiliary radiator)	25Arms (Up to 20Arms without auxiliary radiator)	40Arms Up to 30Arms without auxiliary radiator)	80Arms (Up to 60Arms without auxiliary radiator)	
	Peak current (PEAK)	12Ap	48Ap	80Ap	120Ap	
Feedback signal	2500P/R (incremental differential 5V encoder);magnetic encoder;absolute encoder (for FD1X4S-CB-005 and FD1X4S-EB-005)					
Brake chopper	An external braking resistor (depending on the working conditions, mainly used for quick start and stop), the braking voltage absorption point is 73V (FD164S is 63V) (software setting).					
Brake chopper threshold	DC73V ± 2V (default value, can be set)			DC63V ± 2V (default value, can be set)		
Over-voltage alarm voltage	DC83V ± 2V			DC70V ± 2V		
Under-voltage alarm voltage	DC18V±2V			DC18V±2V		
Cooling method	Natural cooling Remark1: The output currents of FD124S, FD134S and FD144S are 15Arms, 25Arms and 40Arms respectively. The value measured on an oxide black 6063 aluminum plate of 300mm*300mm*10mm. 2: The output current of FD164S is 80Arms, the drive needs to be installed on the auxiliary radiator. The length*width*height is the value measured on an oxide black 6063 aluminum plate of 400mm*400mm*10mm.					
Weight(Kg)	0.3	0.3	0.6	0.9	1.68	
General functions	Input specification	4-channel digital input, common to COM1 terminal, high level: 12.5~30VDC, low level: 0~5VDC, maximum frequency: 1KHz, input impedance: 5KΩ.(the brake motor drive is a 3-way digital input)				
	Input function	Freely define as needed, the functions are as follows: drive enable, drive error reset, drive working mode control, speed loop proportional control, positive limit, negative limit, origin signal, command reversal, internal speed segment control, internal position segment control, emergency stop, start to find origin, command activation, electronic gear ratio switching, gain switching				
	Output specification	2 digital outputs, brake motor drive is 1 digital signal output				
	Pulse direction control	Pulse+direction, CCW+CW, A phase+B phase (3.3V~24V) Note: Only FD1X4S-L□-000 supports this function				
	Output function	Freely define according to needs, the functions are as follows: drive ready, drive error, motor position arrives, motor zero speed, motor holding brake, motor speed arrives, index Z signal appears, maximum speed limit reached in torque mode, motor lock shaft, motor limit bit center, origin found				
	RS232	The default baud rate is 38400 and the maximum baud rate is 115.2K. Can use Kinco host computer software for linking, or use custom protocol to communicate with the controller				
	Protective function	Overvoltage protection, undervoltage protection, motor overheating (I2T) protection, short circuit protection, drive overheating protection, etc.				
Bus function	Modbus/RS485	Maximum support 115.2K baud rate, can use Modbus RTU protocol to communicate with the controller				
	CAN BUS	Maximum support 1M baud rate, can use CANopen protocol to communicate with the controller				
	EtherCAT	Support CoE (CiA402 protocol) and CSP/CSV/PP/PV/PT/HM mode, the communication speed is 100M.				
Use environment	Operating temperature	0~40°C				
	Storage temperature	- 10°C~70°C				
	Humidity (no condensation)	Below 90%RH				
	Protection level	IP20				
	Installation site	Dust-free and dry place (such as electrical cabinet)				
	Installation method	Vertical installation or horizontal installation				
	Height	The rated working altitude is below 1000m. When the working altitude is above 1000m, every 100m rise, it needs to be derated by 1.5%. The maximum working altitude is 4000m above sea level.				
Atmospheric pressure						86kpa~106kpa

OD1X4S technical specifications table

OD1X4S servo drive			
Model parameters	OD114S-□□-000	OD124S-□□-000	OD134S-□□-000
Rated input voltage	Power supply	24VDC~60VDC	
Rated output current	Logic power supply	24VDC 1A (unnecessary)	
Peak current (PEAK)	5Arms	10Arms	20Arms
Feedback signal	2500P/R (incremental differential 5V encoder) Magnetoelectric encoder		
Brake chopper	An external braking resistor is required (depending on the operating conditions, mainly used in the occasion of rapid start and stop)		
Brake chopper threshold	DC73V ± 2V (default value, can be set)		
Overvoltage alarm voltage	DC86V ± 2V		
Undervoltage alarm voltage	18V±2V		
cooling method	Natural cooling		
Weight(KG)	0.266	Natural cooling Remarks: Continuous current 16A (without radiator) Continuous current 20A (add an oxide black 6063 Aluminum radiator with a size of 150mm*150mm*10mm)	
Universal function	Input specification	4-channel digital input, common to COM1 terminal, high level: 12.5~30VDC, low level: 0~5VDC, maximum frequency: 1KHz, input impedance: 5KΩ.	
	Input function	Freely define as needed, the functions are as follows: drive enable, drive error reset, drive working mode control, speed loop proportional control, positive limit, negative limit, origin signal, command reversal, internal speed segment control, internal position segment control, emergency stop, start to find origin, command activation, electronic gear ratio switching, gain switching	
	Pulse control	Pulse + direction, CCW + CW, A phase + B phase (3.3V~24V)	
	Analog input	Voltage input range: -10V~+10V; input impedance 200K, input sampling frequency 4KHz	
	Output specification	2-channel digital output (maximum driving current 100mA) 1-channel brake driving output (requires external 24VDC driving current maximum 500mA)	
	Output function	Freely define according to needs, the functions are as follows: drive ready, drive error, motor position arrives, motor zero speed, motor holding brake, motor speed arrives, index Z signal appears, maximum speed limit reached in torque mode, motor lock shaft, motor limit bit center, origin found	
	RS232	Maximum support 115.2K baud rate, can use Kinco host computer software to link, can also use custom protocol to communicate with the controller	
Bus function	Protective function	Overvoltage protection, undervoltage protection, motor overheating (I2T) protection, short circuit protection, drive overheating protection, etc.	
	Modbus/RS485	Maximum support 115.2K baud rate, can use Modbus RTU protocol to communicate with the controller	
	CAN BUS	Maximum support 1M baud rate, can use CANopen protocol to communicate with the controller	
Use environment	EtherCAT	Support CoE (CiA402 protocol) and CSP/CSV/PP/PV/PT/HM mode, the communication speed is 100M.	
	Operating temperature	0~40°C	
	Storage temperature	- 10°C~70°C	
	Humidity	Below 90%RH	
	Protection level	IP20	
Installation site			Dust-free,dry and lockable (such as electrical cabinets)
Installation method			vertical installation
High			The rated working altitude is below 1000m. When the working altitude is above 1000m, every 100m rise, the derating needs to be reduced by 1.5%. The maximum working altitude is 4000m above sea level.

Note:

 □□=CA:Communication port RS232, CANopen, pulse
 □□=EA:Communication port RS232, EtherCAT, pulse

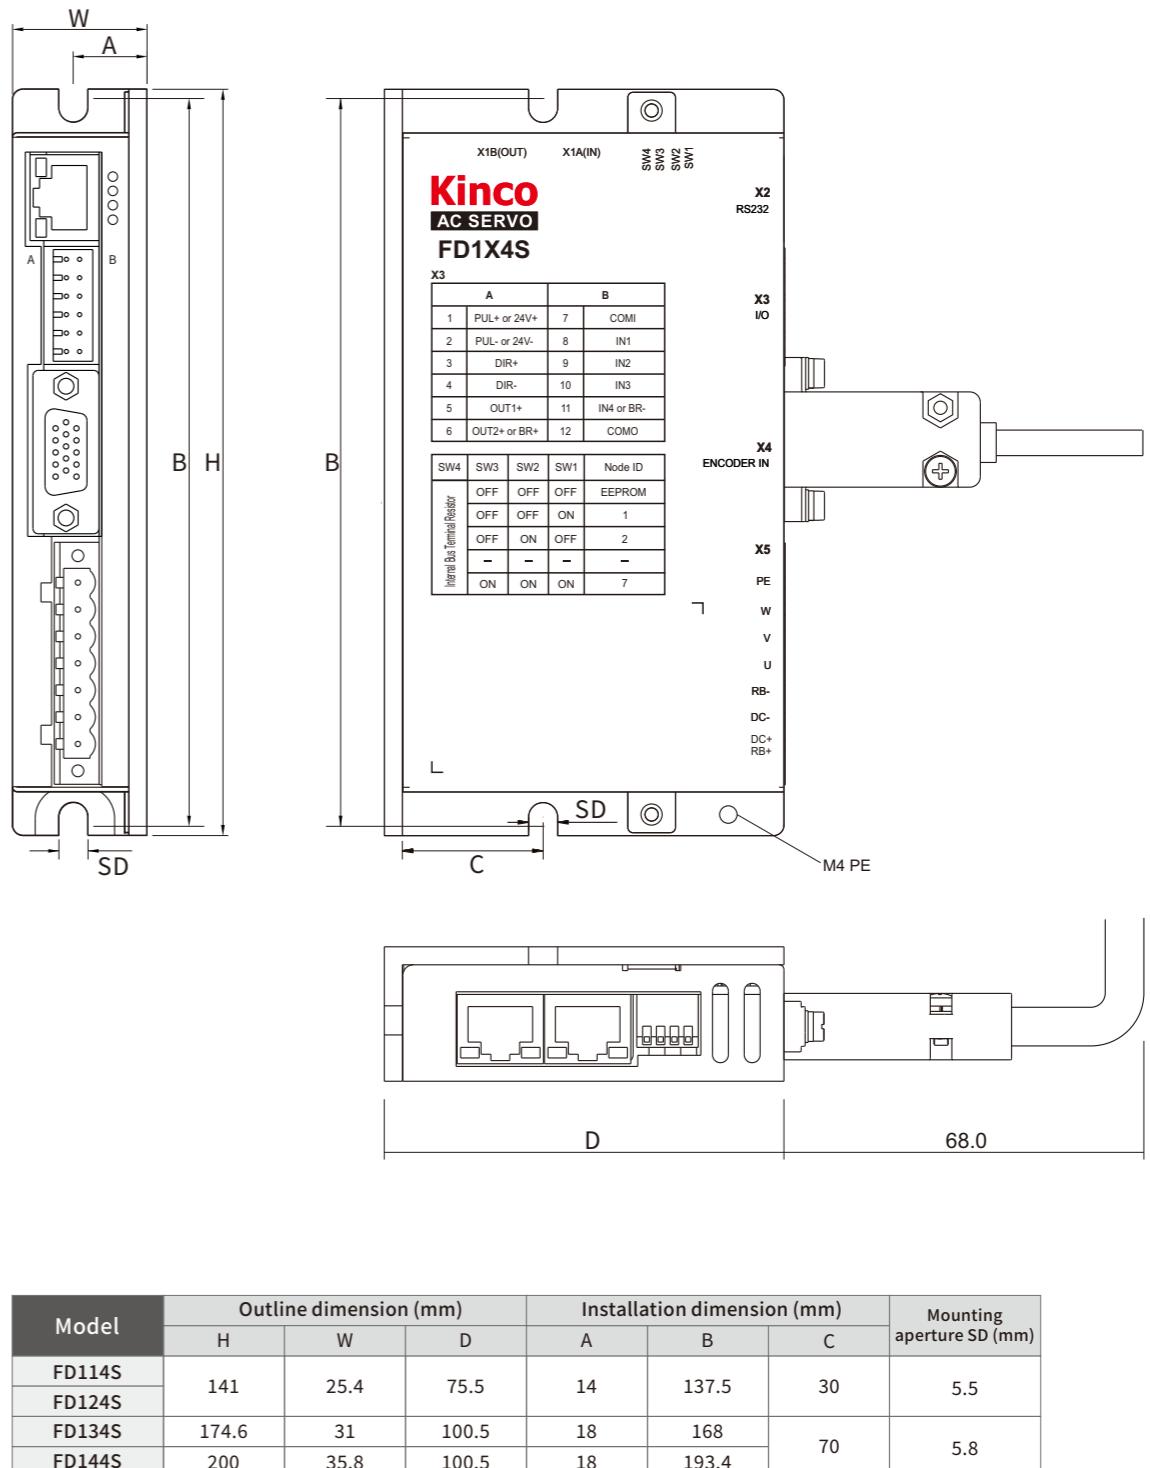

FD134S two-in-one drive technical specifications table

Two-in-one drive				
Model parameters	FD124S-AB-020-D2	FD134S-LB-000-D2	FD134S-CB-000-D2	FD134S-CB-020-D2
Rated input voltage	Power supply 24VDC~60VDC Built in fuse Have(20A) Logic power supply Have (24VDC)	None		
Rated output current	Maximum continuous output current (rms) 15A (up to 12A without auxiliary cooling) Peak current(PeAK) 20A(Restricted by fuses) Feedback signal 2500P/R(incremental differential 5V encoder): magnetolectric encoder	20A (up to 15A without auxiliary cooling) 80A		
Energy consumption braking	It can be externally connected with brake resistor (depending on the operation, mainly used in the situation of rapid start and stop), and the brake voltage absorption pointis 73V (software setting)			
Energy consumption braking voltage absorption point	DC73V ± 2V (default value, settable)			
Oversupply alarm voltage	DC83V ± 2V			
Undervoltage alarm voltage	DC18V± 2V			
Cooling mode	Natural cooling Note: When the output current ofthe drive is 20Amms, the drive is installed on the auxiliary radiator, and the length *width * heightofthe drive is the value measured on 300mm * 300mm * 10mm oxidized 6063 aluminum plate			
Weight (Kg)	0.566	0.9	1.29	
Mechanical dimension (mm)	140*90.8*42.6	207*100.5*33.9	196*124.2*54.6	
General function	Input specification 3-channeldigital input: Digital input has COMI terminal, high level: 12.5~30VDC, low level: 0~5VDC, maximum frequency: 1KHz, input impedance:5KΩ Note:FD124S-AB-020-D2&FD134S-CB-020-D2 only 2 digital inputs			
	Input function It can be freely defined as required, and its functions are as follows: drive enable, drive error reset, drive working mode control, speed loopproportional control, positive limit, negative limit, oriein signa,command reverse, internal speed segment control, internal position segmentcontrol, emergency stop, start to find origin, command activation, electronic gear ratio switching, gain			
	Output Specification 1 digital output, driving capacity of 100mA	None		
	Output function Freely defined as needed,the functions are as follows: drive ready, drive error, motor position to, motor zero speed, motor holding brake, motor speed to,index Z signal appears, maximum limit speed is reached under torque mode, motor shaft locking, motor limit center, and origin finding			
	Pulse direction control None	Pulse+direction, CcW+CW, A phase+B phase (3.3V~24V)	None	None
	Protection function Overvoltage protection, undervoltage protection, motor overheating (IT) protection, short circuit protection, drive overheatingprotection, etc			
	Brake 1-channel brake output (built-in 24V brake power supply, output capacity is 0.8A), Note:FD124S-AB-020-D2 supports external power output brake and is not controlled by the driver			
	RS232 The default baud rate is 38400, and the maximum baud rate is 115.2k. Kinco host computer software can be used to linkor custom protocol can be used to communicate with the controller			
Bus function	RS485 Maximum baud rate of 115.2K is supported, and Modbus RTU protocol can be used to communicate with the controller			
	CAN BUS Maximum IM baud rate is supported, and CANopen protocol can be used to communicate with the controller			
Use environment	Working temperature 0~40°C			
	Storage temperature -10~70°C			
	Humidity (no condensing) Below 90%RH			
	Protection class IP20			
	Installation site Dust free, dry and lockable (such as electrical cabinet)			
	Installation method Vertical or horizontal installation			
	Height The rated working altitude is below 1000m. When the working altitude is above 1000m, 1.5% derating is required for every 100m rise. The maximum working altitude is 4000m.			
	Atmospheric pressure 86kpa-106kpa

Digital signal input

MD series integrated servo motor

Innovative and practical integrated design

Compact structure

The product integrates servo drive and low-voltage servo motor, which is smaller in size and saves equipment installation space.

High reliability

Eliminate the connection line between the motor and the drive, reduce equipment failures caused by connection problems, and reduce the equipment failure rate.

Lower cost

Save connecting cables and effectively reduce equipment cost.

Integrated servo motor naming rules

MD series integrated servo drive model description

Model description: MD 60- 040 - D M A K - CA - 000

①-Series name	MD:Integrated servo motor	⑤-EnCoder type	M:Magnetoelectric encoder
②-Flange	60:60x60(mm) 80:80x80(mm)	⑥-Brake	A:None B:Have
③-Rate power	0020:20x10(W) 0040:40x10(W) 0075:75x10(W)	⑦-Outgoing shaft style	K:Keyed
④-Supply voltage	D:DC48V	⑧ Control mode	LA:RS232,RS485,pulse CA:RS232,CANopen,pulse EA:RS232,EtherCAT PA:RS232,Profinet

⑨ Software version number 000:Software version number

Note: The oil seal is an optional accessory, and it can be omitted if it is not necessary.

MD integrated servo motor technical parameter

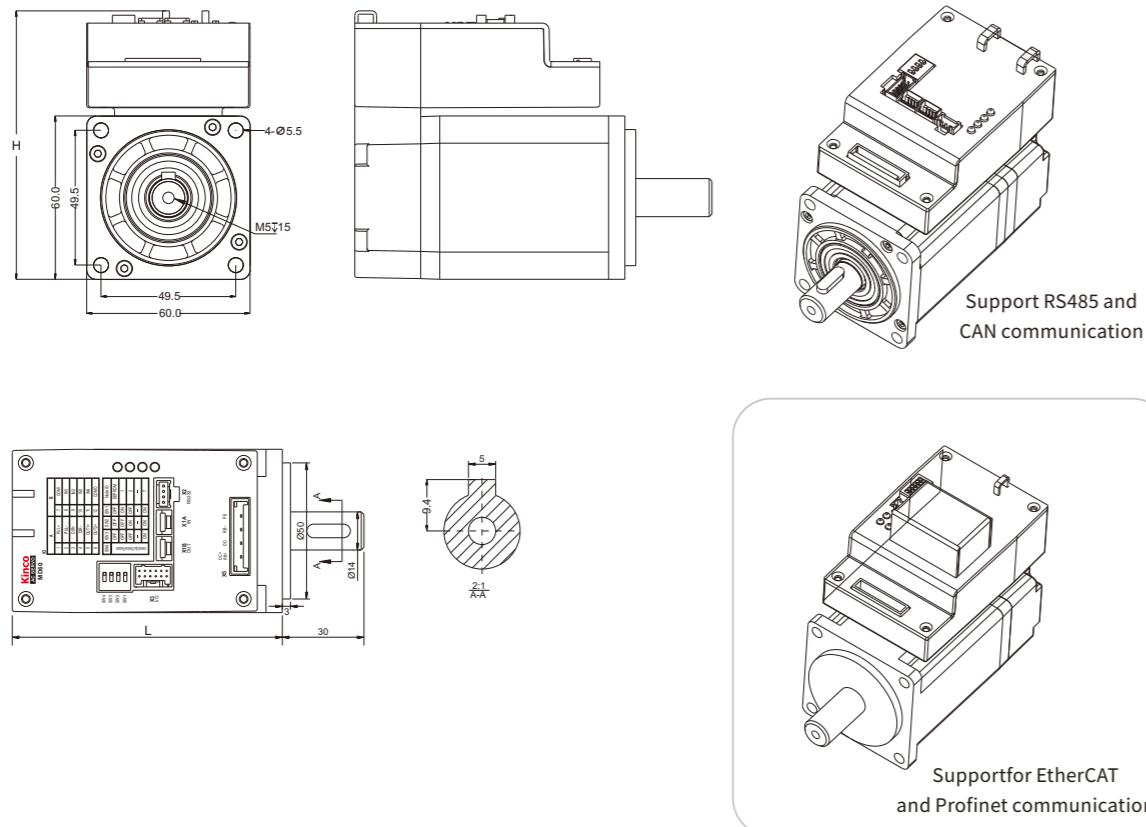

Model parameters	MD integrated servo motor		
	MD60-020-DM□K-■A-000	MD60-040-DM□K-■A-000	MD80-075-DM□K-■A-000
Power supply	Power	24VDC~60VDC	24VDC~60VDC
Current	Rated current(rms)	5Arms	10Arms
	Peak current(PEAK)	21Ap	36Ap
	Brake holding torque T(Nm)	1.5	1.5
	Feedback signal	Magnetoelectric encoder	
	Energy consumption braking	Need for external braking resistor (depending on the operating conditions, mainly used in the case of rapid start/stop)	
	Energy consumption brake voltage absorption point	DC73V ± 2V (default value, settable)	
	Ovoltage alarm voltage	DC83V ± 2V	
	Undervoltage alarm voltage	DC18V ± 2V	
	Cooling method	Natural cooling	
	Input specification	4-channel digital input,with COM1 terminal, high level:12.5~30VDC,low level:0~5VDC, max frequency:1KHZ, input impedance:5KΩ	
	Output specification	2-channel digital output common COMO terminal Maximum output current: 100mA	
	Impulsive control	Pulse+Direction,CCW+CW, Phase A+Phase B (3.3~24V) The input voltage:3.3V~24V; Maximum frequency:500KHz (note:MD -060-D MK-EA-000 don't support this function)	
	Brake	Built-in brake power supply	
	RS232	The default baud rate is 38400bps, and the maximum baud rate is 115.2Kbps. The host computer Kincoservo+	
	RS485	Maximum support 115.2Kbps baud rate, can use Modbus RTU protocol to communicate with the controller	
	CAN BUS	Maximum support 1Mbps baud rate, can use CANopen protocol to communicate with the controller	
	EtherCAT	Support CoE(CiA402 protocol)and CSP/CSV/PP/PV/PT/HM mode, communication speed 100M	
	Profinet	Support No. 1 message, No. 3 message, No. 111 message, process object, aperiodic data read and write, etc.	
	Rated Speed nN(rpm)	3000	
	Rated Torque Tn(Nm)	0.64	1.27
	Rotational inertia Jm (Kg·cm ²)	0.214	0.405
		0.218 (with brake)	0.409 (with brake)
			1.099 (with brake)
Operation environment	Operation temperature	0~40°C	
	Storage temperature	-10°C~70°C	
	Humidity(non-condensing)	Below 90%RH	
	Protection level	Shaft end IP54, protection level IP20	
	Installation environment	Dust-free, dry and lockable (such as electrical cabinets)	
	Installation mode	Vertical or horizontal installation	
	Height	The rated working altitude is below 1000m.When the working altitude is above 1000m, every 100 meters of ascent is required, and the maximum working altitude is 4000 meters above sea level	
	Atmospheric pressure	86kpa~106kpa

Input and output terminal wiring diagram (MD series)

A new generation of G2 series servo motor

New electromagnetic design

The design adopts 12 slots and 10 poles, with small cogging torque and low torque ripple, which is conducive to reducing vibration during motor operation and making torque output more stable.

New structure and short fuselage

The fuselage structure is redesigned and the length of the fuselage is shortened, which can save more installation space for customer equipment and reduce equipment size.

The latest magnetoelectric coding technology

The independently designed magnetoelectric encoder has good shock resistance and high cost performance.

Insulation class F

The motor is at the highest level of insulation in the industry, and it can maintain high reliability and stability in high temperature extreme environments.

Model description / model list

Note 1: Operating environment

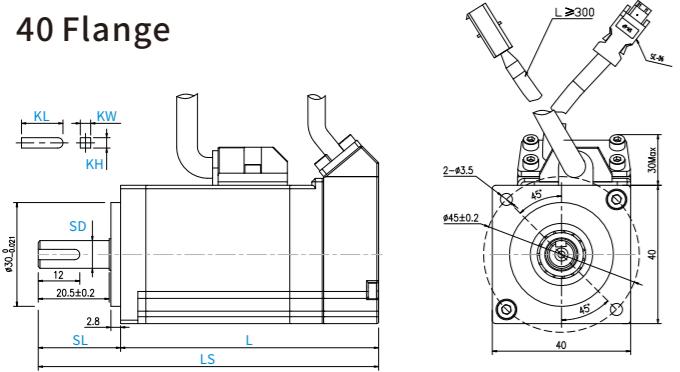

Temperature: -20~40°C (no freezing)
Humidity: below 90%RH (no condensation)
Environment: keep away from corrosion, flammable gases, oil droplets, dust
Altitude: 1000~4000m, every 100m increase, power decreases by 1.5%
Protection class: (1) body IP65, shaft end (without oil seal) IP54 Shaft end installation oil seal IP65
(2) for oil seal installation, please refer to the product instruction manual
Energy efficiency class: class 2

Note 2: □=A:Without brake
□=B: With brake

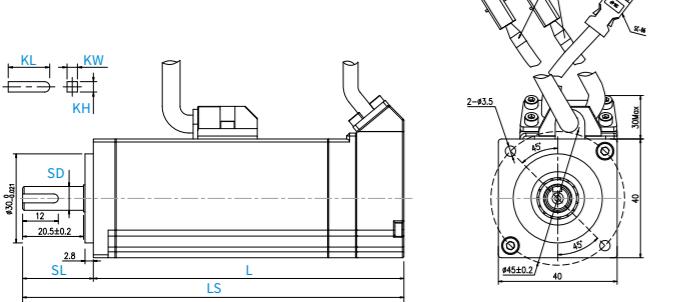

Note 3: The values in parentheses in the moment of inertia column are the values of the moment of inertia column of the brake motor
